

Suggested Applications

- ◆ Crosswalks
- ◆ Intersections
- ◆ Sidewalks
- ◆ Medians
- ◆ Roundabouts
- ◆ Pedestrian Malls

Product Advantages

- ◆ Easy to repair and maintain
- ◆ Simply laid onto existing asphalt and concrete or inlaid to provide a "flush" surface
- ◆ Highly durable with the highest resistance to cracking and indentation in any climate
- ◆ Opened to traffic in one hour or less after installation
- ◆ Many potential paving/color patterns
- ◆ Ideal for use in high volume traffic
- ◆ Can be applied in cold and hot temperatures
- ◆ High skid resistance
- ◆ Snow ploughable after installation
- ◆ Resistant to salt and de-icing materials
- ◆ Eco-friendly natural and recycled components

Imprint® is at the forefront of unique paving options. This synthetic paving surfacing material replicates the appearance of brick pavers and is ideally used for crosswalk treatments, sidewalks, medians and road delineation.
